CLARESHOLM LOCAL NEWS

Help the U. F. W. A. ladies with their rest room fund October 10th.

We understand, that Ike Lepine's crop went 38 bushels No. 1 grain to the acre. He is a lucky dog.

A. P. Moore, manager of the Claresholm branch of the Union Bank, returned on Thursday from a trip to Saskatchewa

T. D. Lewis returned last Friday from his trip to North Dakota where he has been for some weeks looking after his farm interests.

Huckle's Famous Hawaiian Singers and Musicians will be at the Rex again Tuesday, Oct. 19. Reserved seats will be on sale at the drug store shortly.

R. S. Law leaving on Saturday for a trip to Calgary. With other U. F. A. men will meet the staff commission which sits in Uganda.

W. D. Amable purchased Dr. Patrick's ranch west of Calgary last week. He has since purchased a threshing outfit in town and shipped it to his ranch. He reports a fine crop of oats.

Ed. Gray returned from a trip to Calgary on Saturday night accompanied by his wife. The ceremony took place in Calgary. The young lady arrived from the old land but a few days ago.

The Methodist Sunday school will hold its rally next Sunday, October 6th at 1 p.m. The boys and girls of the school are asked to be on hand. An address will be given by Rev. F. H. Irving of Cayley, secretary of the district.

The item in our last issue in reference to payment of taxes before the end of September to secure a reduction of 50% on the taxes in Claresholm only. Some understood that it applied to other towns and districts as well, which was not the case.

Mrs. Carl Foss and family left for Vancouver on Friday morning. They intend spending the winter there.

On Wednesday, October 6th, Mrs. Hall will sell, without reserve, a fine bunch of well bred cattle, in first class condition, including a splendid registered Shorthorn bull, good galloway, etc. For full particulars of this sale see full page ad in this issue of the Review-Advertiser. Albert E. Strange, Auctioneer.

The Claresholm Local of the U. F. W. A. will hold a sale of fancy and useful articles, home cooking, and afternoon tea in the hall of the Standard Club, October 10th, from 3 to 6 o'clock.

Each member is asked to contribute three articles of home cooking and one of useful work. There will also be a rest room in the hall of the Standard Club.

We appeal to all

farm women and everyone who

would like to help in this worthy cause.—E. Blanche Slipp, President.

We are sorry to report the death of Mr. George Dennis, which took place this morning. He has been in poor health for some time. His death was hardly expected so soon. Mr. Dennis came to this district from Ontario in 1914.

Mrs. Annie Brown and uncle to Brown Brothers who live east of town.

He was greatly respected

by all who knew him. The

funeral service will be held at the residence on Saturday afternoon at 2:30 o'clock.

The welcome young star Edith Roberts in a storm-and-sunshine comedy of life, love and laughter "Alias Miss Dodd," directed by Harry Franklin. An old fogey who has done a great deal of devilishness, a romantic young girl, a lounge lizard, an amateur criminologist and an honest-to-goodness guy. All steeped in deadly earnestness, that even the most male is a creature. If you like drama, like farce or like comedy this is your picture. See it at the Rex next Friday and Saturday.

Good Roads Are Of Inestimable Value To the Rural Districts

The highways of a country are one of a nation's most important assets and play a large part in colonization and land settlement. The construction of good, serviceable highways, next to the buildings of railroads, is probably the chief factor in increasing the price of land, while the adequate marketing facilities, which are of good roads, is an important part of agricultural progress and prosperity.

A high grade of public thoroughfare, with a progressive and widespread policy of road-making and extension, has been deemed necessary in the eyes of intending farmers, settlers, seriously detracts from the aggregation many indecencies. Again, it can be easily seen that Canada's completeness is a natural and extensive feature of national wealth, and constitutes the fourth principal source of the country's revenue. As a great part of this touring is done by automobile, and this mode of travel is rapidly increasing, it is readily seen that the provision of good trunk roads is necessary in order to keep up the traffic and further encourage it.

That Canada is alive to the necessity of the improvement of maintaining substantial roadways and carrying out annually a program of extension, is evinced by the series of Federal and Provincial grants to this end. Expenditures for the year ending April 1, 1918, have amounted to \$20,000,000, and the program at present being carried out will result in the disbursement of \$73,000,000.

Besides the active local road-building, county, municipal or provincial highway associations exist for the con-

operation of these smaller bodies within the province and the furtherance of the provincial programs. Annually, an international convention is held at some central point, and is attended by the various ministers of public work, highway commissioners, road-building experts from both sides of the line, where papers are read on all phases of the subject, and exchange policies are devised and progressive projects advocated.

Just how important Canadian highways are to the people of the Dominion may be judged from the fact that they already aggregate more miles than have been allocated for their construction, together with the improvements carried out thereon, amount in value to no less than \$750,000,000. It has been estimated that during the year the traffic carried on the railroads is a million miles, two miles on the highways. Canada averages one mile for every 22, whereas in the United States it is one mile for every 55.

The construction of good roads, so that the farmers may easily reach their market, is the biggest consideration in the building of Canadas roads, and the co-operation of farmers is enlisted by the local authorities, related to certain portions of the task. The main portion of easily travelled motor roads is another important consideration which is also followed with a progressive program. All provinces except the Dominion have linked their modern methods and a coast-to-coast motor road has been advanced for some time; one by one the gaps are being bridged, and it will undoubtedly shortly come into existence.

Want Higher Charge For Storing Grain

**Fort William and Post Arthur Ter-
minals Would Raise
Charges**

Increases in the tariff charges for elevating and storing grain have been asked on behalf of the Fort William and Post Arthur terminals by J. C. Gage, in his application made to the Board of Grain Commissioners for Canada. He asked that the present one cent per bushel for elevating and storing grain be increased to one and one-quarter cents, and he gave the increased cost of operation over other years.

Fred. W. Riddle, Saskatchewan Co-operative Elevator Company, supported the application and asked that the period of time storage be extended from 15 to 10 days. Mr. Gage also applied for an increase in the rate for storing mixed grains and screenings. The increase asked is from two to three cents for mixed grains, and three to four cents for screenings.

Worse Than a Czar

**Destruction and Death in the Wake
of the Rule of
Lenin**

Lenin has been called an "inverted Czar." The Russian Czar, Tsar, even inflicted such misery upon so many millions of people as has the fanatic and remorseless Lenin. The official reports of his own agents show how destruction and death have followed in the wake of his rule. This is a real government in Russia; solely a ruthless dictatorship. No laws are passed; only arbitrary decrees are issued. The courts do not sit; merely the ferocious revolutionaries, officials, soldiers, and sailors are allowed to talk of the worst of the Czar! He chafed with scorpions; — New York Times.

Discovery of Sails

A discovery, the value of which is not known, but is being investigated, has been made at a point seventeen miles north of Viceroy, Saskatchewan by a party of gentlemen visiting the district, of a deposit of crystalline salts. The area is said to be covered by the deposit, estimated to be about 200 acres. The greater portion of it is covered by about six inches of soil, and though a hole was excavated to a depth of three feet the bottom of the deposit was not reached. The salts will be analyzed to ascertain the commercial value.

"Is your husband having any luck with his garden?" "Oh, yes. He got a sunstroke and collected \$300 from a health insurance." — Boston Transcript.

The Death Toll of Speed

Problem Demanding Grave Study by National Legislators

Some really startling figures have been presented to the National Safety Council of the United States, which is holding its annual session at Atlanta City. They demand the immediate increasing toll of human life that according to General Secretary S. J. Williams, is the price of the modern speed craze. "The motor menace," as it is called, has become a problem of increasing gravity, and the automobile manufacturers, like all organizations having to do with the public welfare.

Officials statistics for the past year, presented to the members of the Executive of the Safety Council show that "three times as many people are killed by automobiles as are killed in all the factories, mines, railroads and other industries in America." During the year, 73,000 persons were killed in motor accidents, the same number as were killed by automobile in the United States early thirty-five minutes. In that same period from this cause were over twenty-five percent greater in number than the similar figure for the previous year.

The report adds, for the purpose of comparison, a British official statement dealing with the commercial development of the aeroplane. It shows that over 73,000 persons were killed in motor accidents in Great Britain last year with but one fatality.

According to the estimates prepared for the council the terrible toll from automobiles is due almost entirely to the reckless and the craze for speed. Ninety-nine percent of the fatalities are ascribed to these two causes. But because the killings have increased in an even greater ratio than has the number of automobile drivers, the Council believes the situation should be given immediate consideration by the automobile makers of the country "unless they expect soon to be confronted by a great volume of hostile public opinion."

It must be clear that such a staggering death rate cannot continue without causing unusual action. Safety legislation can be tightened, and stronger and more logical legislation can be obtained for everything. The great need is for the development of strong and congenitely sentiment among owners of automobiles themselves against the reckless driver and the speed-freak.

Making Life on The Farm Appealing

Good Roads and Cheap Automobiles Should Play a Good Part

Since the war a problem which has been worrying agriculturists all over the country is that of keeping the boy and the girl on the farm. All the authorities, that I am aware of, have quite plainly that no panacea has been discovered to meet the difficulty in connection with the exodus of the boys and girls from the farms. I think that hon. gentlemen who are agriculturists will agree with me that a great deal of the difficulty lies in the fact that the young people are not in comfortable conditions such as will be conducive to happiness and contentment; by making conditions tolerable for the farmer's wife; and generally by doing away with the bad methods by which the farm apprentices are treated.

In addition to this I think that good roads and cheap automobiles should play a great part in helping to keep the young people on the farms by reducing very considerably the cost of living. The different ways in connection with his work and by enabling him and his family to move around and mix with the neighbors thus obtaining some social pleasure out of life—Hon. S. F. Tolmie, in the House of Commons, May 14, 1920.

Out to Save

A north of Ireland man went into a post-office and handed over a telegram addressed to a remote part of Ireland.

The post-office clerk informed him that the charge would go on our shipping and in consequence he had to return the telegram.

"How do you make that out?" "Ninepence for the wire, and a shilling for portage and delivery out-side the radius."

"I'm a fool!" retorted the hard-headed Northerner. "You send the telegram, and I'll write and ask him to fetch it."

Wisdom is to put your trust in Providence, but it's unsafe to go around looking for holes for Providence to pull you out of.

Mennonites Obeying Law

Figures for School Attendance Are Higher than Last Year

According to Martin the latest reports reaching the Department of Education regarding the Mennonite settlements near Swift Current, show a considerable improvement and figures for school attendance are much higher than last year. This is not the result of any change of heart on the part of the Mennonites.

More recently however from the stern measures adopted by the government to compel the Mennonites to obey the education laws of the province. The Premier says that no difference has been noticed in enrolling these laws, as many of the settlers prefer to spend ten days in jail rather than pay the insignificant fine imposed.

"Landlord, there are always a lot of strange people in bailing around here."

"Yes, madam. I'm sorry, but—" "Well?"

"Your rates do not include exclusive use of the ocean."

Tip-Burn Disease On Potato Plants

Growers Often Mistake Trouble For Late Blight

(Experimental Farms Note)

A trouble which is widely distributed and very prevalent in some seasons and to which the name "tip-burn" has been given, is to be found in potato plants. The trouble takes the form of a gradual withering and drying-up of the leaves of the plants, often commencing at a comparatively early stage in their growth and, in many cases, it allows to go to a withered state, but sometimes to a shriveling state before the tubers are developed.

The appearance of this trouble in the fields is often mistaken by growers for late blight. There is, however, a marked difference between the late blight and tip-burn, the latter appearing by attacking any part of the plants—leaves and stems alike—but has a dark, water-soaked appearance, and, in its early stages is damp to the touch, while the tuberous roots are dry at the margin or tips of the leaves and has a decidedly dry appearance and touch with the exception of after rain. It also appears much earlier in the season than does late blight, which has come in and, in some cases, may cause the death of the plants so rapidly. Nor has it ever been proven so destructive as late blight, although evidence has been obtained that in some cases when the seed is sown, it is often a curse to the crop.

According to the estimates prepared for the council the terrible toll from the automobile is due almost entirely to the reckless driver and the speed-freak.

Investigators of this trouble are asked to submit to us the cause of the trouble. The observations of some have led to the belief that a period of hot, dry weather during the growing season causes the leaves to throw off moisture more rapidly than it can be taken in, and that the tubers are dried out.

More recent investigations lead to the belief that this burning of the leaves probably follows the depredations of the insect known as the potato leaf hopper. The investigation is not yet complete enough evidence has been produced to serve as a warning to potato growers to keep these pests well under control in an endeavor to avoid tip-burn.

D. A. ANDERSON

Clareholm Local News

Major Schoo is having a very successful lecturing tour in the Edmonton district.

R. K. Peck spent the early part of the week in the Wainwright district, returning home on Tuesday night.

Remember the U.F.W.A. sale of free work and home cooking on Saturday, October 16, in the Parish Hall.

Norman Holmes spent a few days in Didley this week. It is reported that he has purchased a business there.

Mrs. Norman Lepard moved into town on Friday and will reside in the house recently occupied by H. L. Wannamaker, which she has purchased.

L. P. Christianson returned from a trip to Saskatchewan recently. While there he did some lumbering and made good figure. The new town site was located on the adjoining quarter.

Miss Gregor, mother of Miss Gregory of the public school staff, arrived in town last week and will spend the winter with her daughter. They are living in the Duffy house on Fourth avenue.

Special missionary service at the Methodist church on Thursday evening at 8 o'clock, conducted by Capt. C. L. Lamont of the Salvation Army. She has spent several years in the India mission field and is a very eloquent speaker. All are welcome.

The funeral service of Mr. John Miller was held on Thursday evening at 8 o'clock at the Methodist church on West Locusta Street. There was a large attendance of friends. When the news of his death first came, details of which have not been made public, it was learned that Mr. Miller was employed on a railroad bridge and while walking across the bridge on his way to leave work a block or two away, he had a fall and was attacked by a dog which followed and fell on him as he was passing underneath, with fatal result.

While the Family Sits Around

On quiet evenings or afternoons, put on your favorite records. Play any selection you wish. Be sure to play some of mother's favorite old-time songs and one or two of dad's familiar ballads—play them all on your Columbia Grafonola.

You will get reproductions of exactly what the artists themselves produced on the original wax. Every note, every tone is distinct. The Columbia tone leaves give you complete and accurate control over tone volume without sacrificing tone quality or any of the beauty of your choicest records.

Then there's the Non Set Automatic Stop—no other phonograph has it—built right into the motor. Invisible. Nothing to move or set or measure. Just start your Grafonola, and it plays and stops itself.

Ask us to play these Columbia Records for you:

The Love Nest, from May Down the Trail to Home Sweet Home : Frank Crumit | A-2973

Mother Heart Forgotten : Louis Gravure | A-6160

The Barefoot Trail Lassie O'Mine : Oscar Seagle | A-2961

Naomi—Waltz—Bell Solo Dainty Ann—Gavotte—Bell Solo : Howard Kopp | A-2956

Howard Kopp | A-2956
